

# Crow

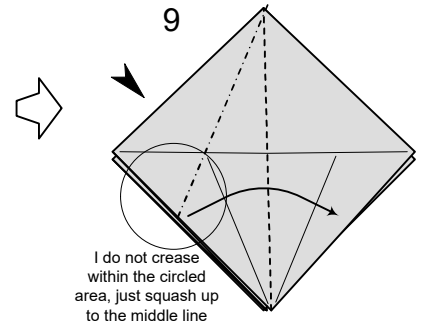

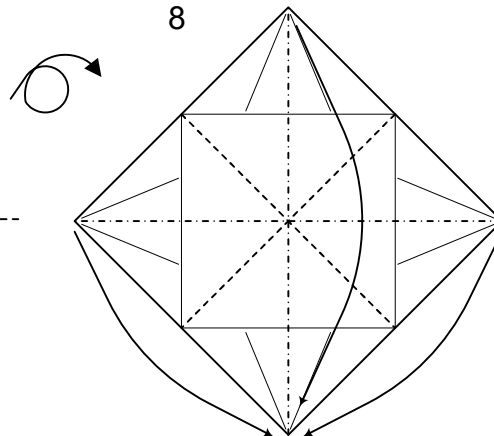

Make 4 valley creases -  
only crease up to the circled reference

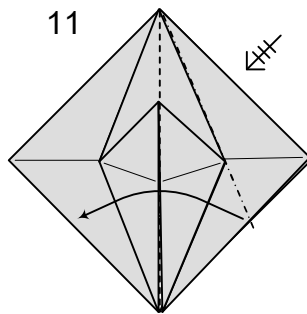

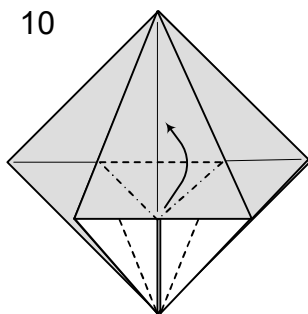

Unfold

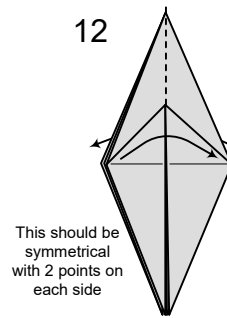

Repeat steps 3 to 5

I do not crease  
within the circled  
area, just squash up  
to the middle line

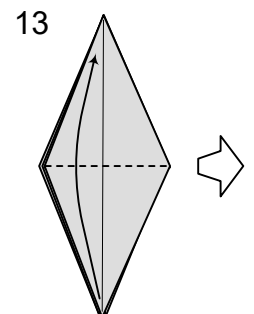

Repeat steps 9 and 10  
on the other 3 sides

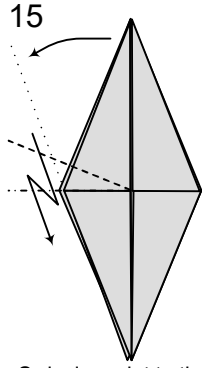

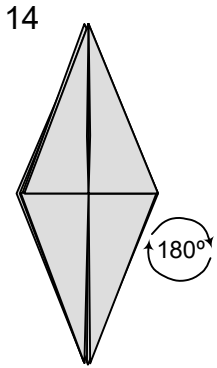

This should be  
symmetrical  
with 2 points on  
each side

Keeping the model  
symmetrical, fold one layer  
across front and back

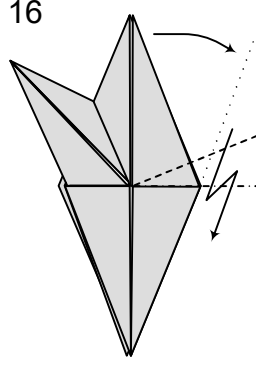

Fold 1 layer to the top

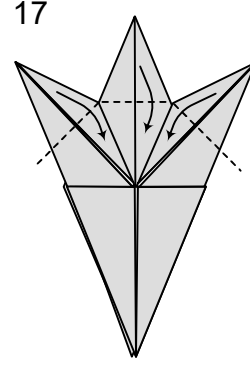

# Crow

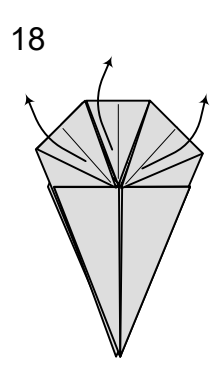

Swivel a point to the left so that it continues the line of the bottom edge

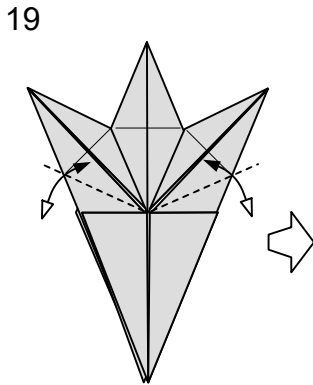

Swivel the other point to the right

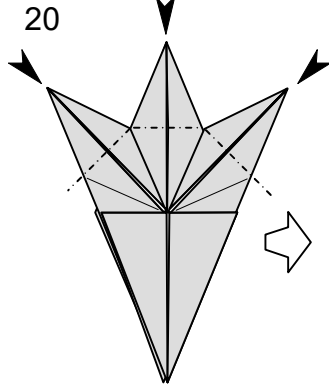

Valley fold the three points to the centre

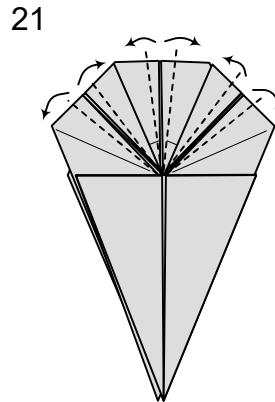

Unfold

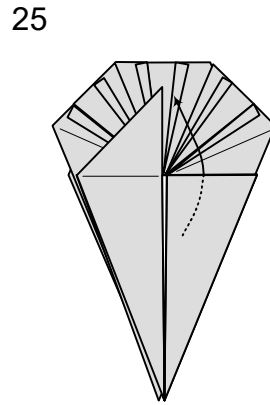

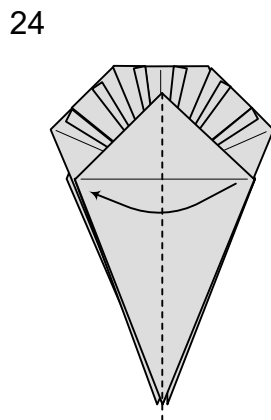

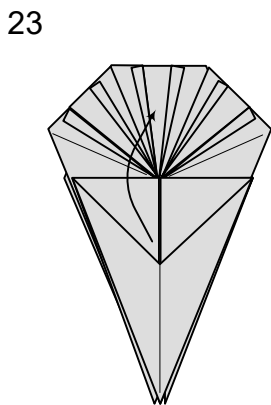

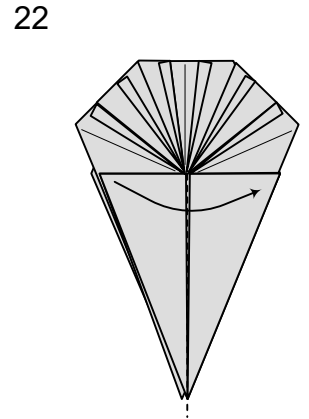

Crease the top layer only - this makes the next step a little easier

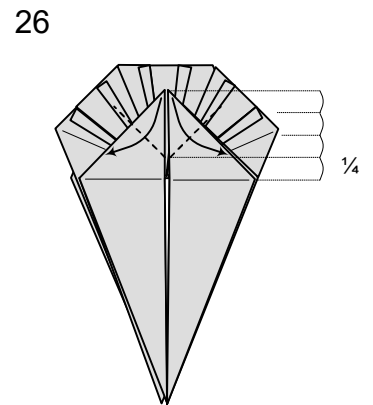

Sink the points inside

Make small valley fold to form feathers

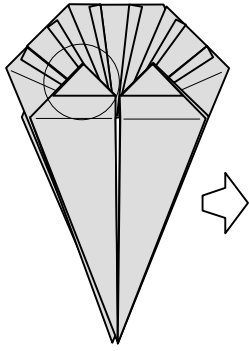

Repeat 22-24 to bring up the other point

This does not have to be exactly one quarter

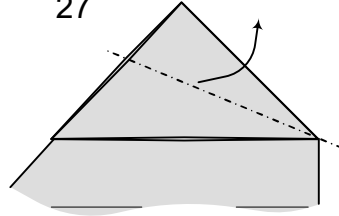

# Crow

26

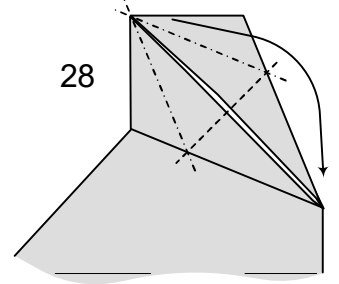

To make the eye, we are going to view the circled point in isolation

27

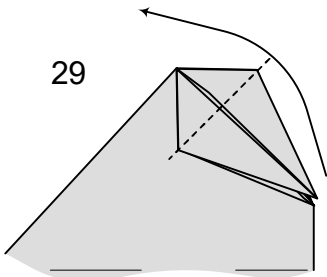

Squash fold

28

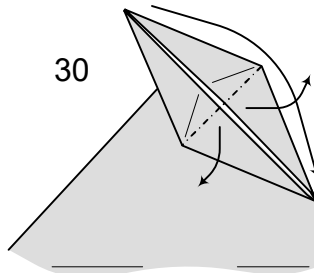

Petal fold

29

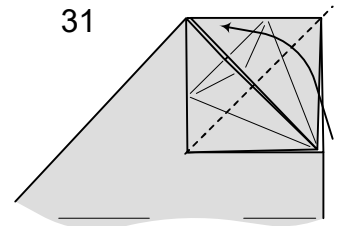

30

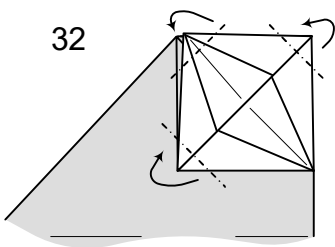

Open up the single layers and squash fold the point down

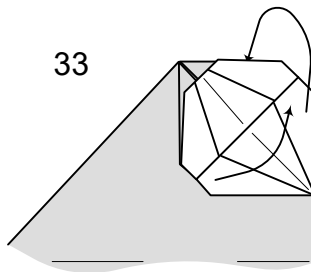

31

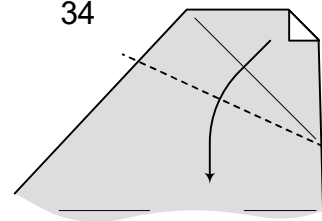

32

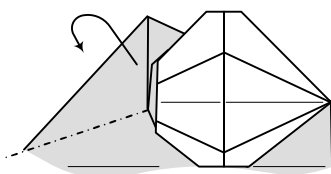

33

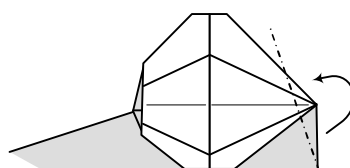

34

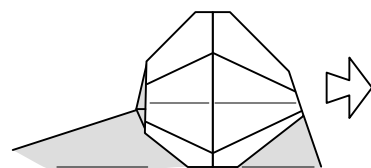

35

36

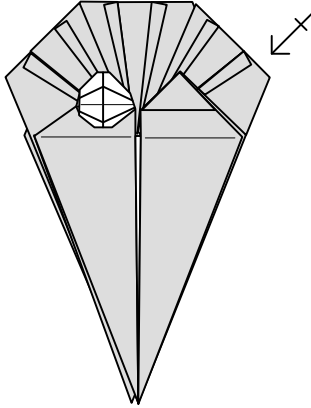

37

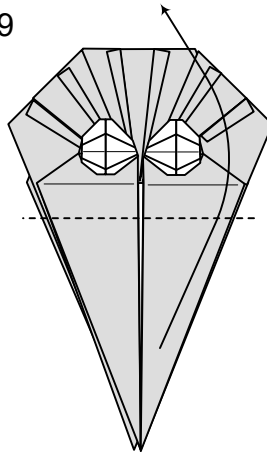

# Crow

38

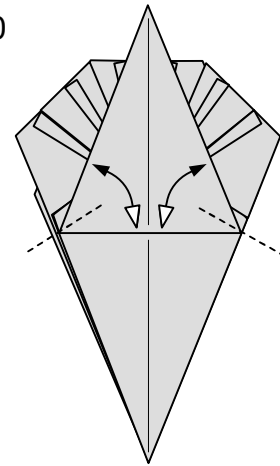

Repeat steps 27-37 on the other point

39

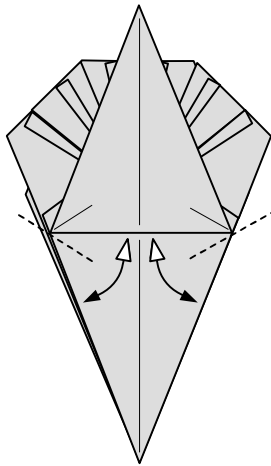

40

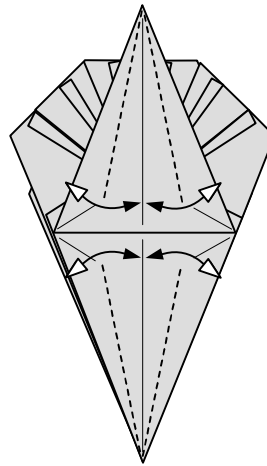

Make 2 sharp creases about half way to the centre line

41

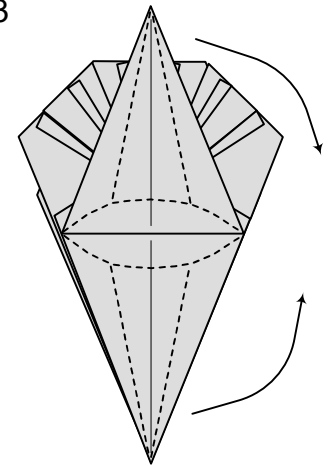

42

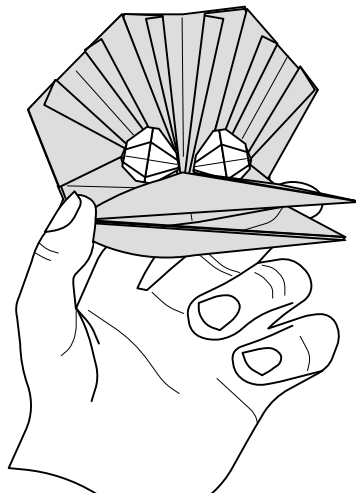

These creases should be made lightly, just bending the paper

43

Make the beak 3-dimensional, gently curving the head back

Gently squeeze the sides to make the beak open and close
